

CUSTOM ROLL FORMING

"Integrated Custom Roll Forming Solutions"

ARI-IPG is a manufacturer of custom roll formed metal products. Our extensive experience, commitment to high quality, efficiency and outstanding service, have allowed us to create long term relationships with our customers.

Step by step **ARI-IPG** takes the raw coil and puts it through the Custom Roll Forming process and produces high quality products within our customers stringent specifications for strength, tolerance, finish, dimensions, physical properties and delivery, every time.

The **ARI-IPG** plant is centrally located in the midwest giving **ARI-IPG** the ability to ship to all parts of the USA and internationally, economically.

ARI-IPG specializes in heavy gauge and deep custom roll formed sections in a number of different types of material, HR, HRP & O, Stainless Steel, and HSLA. We have an 18 Station rafted rolling Mill with 4" and 5" shafts for heavy gauge sections. Flying cutoff for an infinite number of lengths from 6' to 65', Coil widths from 6" to 42" and Gauges from .100 thru .500, with Quality Standards to M1003
